

IAPM WEBINARS

LIST OF TOPICS FOR SYMPOSIA

(Each day one topic from each list will be discussed)

1. A to Z of Cell kinetics
2. Resolution of Inflammation: Mechanism, mediators & markers
3. Hemodynamic parameters & their monitoring: Role in critical care
4. Single gene disorders-classical & non-classical inheritance
5. Lab diagnosis of genetic disorders
6. Recent advances in understanding autoimmunity
7. Primary immunodeficiencies
8. Cancer & Hypercoagulability
9. Molecular mechanism of cancer
10. Lab diagnosis of cancer
11. Approach to anemia with case discussion
12. Approach to bleeding disorders with case discussion

LIST OF TOPICS FOR SLIDE SEMINARS

1. Granulomas: How much do we know?
2. Eosinophil-rich non-parasitic lesions
3. Tumefactive infections & pseudotumors
4. Bodies in human bodies: Pathological & Non-pathological
5. Pigments and minerals: Distinction through special stains
6. Clear cells in Pathology: Histomorphologic approach
7. Tumors with epithelioid morphology
8. Cystic Mediastinal Lesions (Cystic tumors in histopathology : Can we approach?
9. Art of algorithmic Approach- histomorphology
10. Art of algorithmic Approach- Immunohistochemistry
11. & 12. –Same as above list
